Abstract of JP 9191916 (A)

PROBLEM TO BE SOLVED: To advantageously carry a passport, a small-sized tape recorder, or the like by providing a portable bag with a fastening belt held on the body, and a housing bag for housing variables and portable acoustic electronic equipment which is connected to the fastening belt.

SOLUTION: A housing bag 2 for housing variables such as a passport or purse is connected to a fastening belt 1 mounted on the body. The fastening belt 1 has a replacing metal fitting 41 for replacing the fastening belt 1. An air hole 20 is formed on the reverse side of the housing bag 2 so as to be advantage for aeration.; The housing bag 20 has a clamping plate 2t for clamping the lid of the housing bag 2; a chamber 2m for housing a portable acoustic electronic equipment 3 or the like; a chamber 2k for housing a portable telephone; a housing pocket 2n; a pocket 2s for housing a map; and a traverse slippage preventing part 2u. The fastening belt 1 has a cover part 7 for covering the operation part 5 having switches of the portable acoustic electronic equipment 3, and the cover part 7 has a window opening 70 for exposing the switches of the operation part 5.
